PERSONAL PROFILE

Computer Systems Engineer (Ingénieure en systèmes informatiques, ISI) with hands-on experience in enterprise IT infrastructure, AI-assisted identity & access management, and cybersecurity, built through an engineering thesis conducted with Sonatrach, academic projects, and freelance development work. Strong interest in artificial intelligence, cybersecurity, and Identity & Access Management (IAM). Actively seeking a professional position to apply this expertise in a real-world environment.

EDUCATION

Engineering Degree & Master in Computer Systems Engineering (ISI)

École Supérieure en Informatique (ESI-SBA), Sidi Bel Abbès, Algeria • Sept. 2021 – July 2026

- Key focus areas: Computer Systems, Artificial Intelligence, Distributed Systems, Networks, Cybersecurity
- Engineering thesis (PFE): **AegisAIMail** — a policy-driven, AI-assisted Identity & Access Management orchestrator, developed with Sonatrach
- Master's thesis: Zero Trust security analysis of AegisAIMail (STRIDE threat modeling; semi-quantitative scoring inspired by DREAD/OWASP) — both defended July 8, 2026

Baccalauréat – Scientific Stream

Lycée de Relizane, Algeria – June 2021

Overall Average: 16.97/20 | Weighted Average: 17.83/20

PROFESSIONAL EXPERIENCE

Engineering Thesis Intern — Sonatrach

February 2026

- Designed and built AegisAIMail, a policy-driven, AI-assisted IAM orchestrator (Python, FastAPI, NLP, Active Directory, Exchange, systemd, Hyper-V)

Computer Systems Intern_Société Nationale d'Assurance (SAA), Relizane, Algeria

September 2024 – October 2024

- Gained exposure to enterprise IT systems, networks, and Active Directory
- Analyzed and simulated enterprise network architecture
- Took part in IT support and incident-handling activities

Freelance Full-Stack Web Developer (Confidential Project)

Summer 2025 • Public demo: kadi-inv.store

- Designed intuitive UI/UX and user journeys for a custom web platform, focusing on usability and user experience
- Developed frontend using React, JSX, and Tailwind CSS
- Implemented REST APIs with Django REST Framework and PostgreSQL
- Collaborated directly with an entrepreneur under strict confidentiality

Freelance Mobile Developer – KWITELY (Label Projet Innovant)

Summer 2025 • Label Projet Innovant

- Contributed to a mobile application certified by the National Startup Committee
- UI/UX design, system flow analysis, and frontend development using Flutter
- Collaborated within a startup-oriented development team

ACADEMIC & TECHNICAL PROJECTS

Intrusion Detection System (IDS) for Network Attacks Classification

- Designed an IDS capable of detecting and classifying 21 network attack types
- Simulated attack scenarios and applied machine learning techniques

Hajj Pilgrimage Management Platform

- Developed a complete information system for registration, lottery, medical visits, and reservations

Mobile E-Commerce Application for Books

- Designed a mobile app for buying, selling, donating, and exchanging books

Product Management Software – Java (NetBeans)

- Developed a desktop application with CRUD operations and object-oriented design

TECHNICAL SKILLS

Languages

Python, Java, Pascal, JavaScript

Web & Mobile

React, Tailwind CSS, Django REST Framework, Flutter, HTML/CSS

AI / Data

Machine Learning, NLP, Data Analysis

Systems & Identity

Active Directory, Exchange, IAM, Zero Trust, systemd

Databases

PostgreSQL, SQL, NoSQL

Operating Systems

Linux, Windows

Methods & Tools

Agile (Scrum), Git, System Modeling, STRIDE / DREAD threat modeling

LANGUAGES

Arabic: Native

French: Intermediate

English: Intermediate
